

RADIANT SKIN

From the Inside:

As we age, it becomes increasingly more difficult for our bodies to absorb water to become hydrated, which causes ill effects such as a loss of collagen and elasticity in our skin. In summary, this environment is a breeding ground for premature aging!

Take a moment to review how the properties of **Tyent Water™** can benefit your skin's health:

Smaller cluster size =
better hydration for skin and body =
better health all around

Abundance of antioxidants =
neutralization of free radicals =
the neutralization of the primary causes of damaged cells and premature aging.

For the Outside:

By cleansing your skin with acidic water (*water with a pH of 4.0 to 6.0*), you can achieve a more luminous and youthful glow. For basic skin cleansing, use water with a pH between 4.5 and 5.5, as opposed to regular tap water, which usually has a pH of about 7.0.

Why?

Because our skin's natural pH is between 4.5 to 5.5. By using water with a pH that is higher than 5.0, you will disrupt your skin's natural pH level and strip your skin of the essential lipids that it needs to stay healthy and luminous. When skin loses its essential lipids, it will expand and contract unnaturally, causing grounds for premature aging.

Water with a natural pH of 4.5 to 5.5 will act as a natural astringent, which will help keep your skin toned, firm and clear. Acidic water naturally decreases bacteria, helping with acne, large pores and dryness.

Other skin conditions, which are caused or worsened by high pH water, include rashes such as athlete's foot, psoriasis and eczema. For these conditions, cleansing with strong acidic water will prove extremely helpful, and may even clear up such conditions.

In Korea and Japan, hospitals sterilize wounds and care for diabetic ulcers using acidic water. They also use acidic water to aid in sanitization practices, which helps to eliminate infectious bacteria. Read on for a more in-depth understanding of ionized water and how it works.

TAKE THE SHORTEST PATH TOWARD HEALTH AND LONGEVITY

Prevention is the key. Most people don't fully appreciate their health until they lose it. As said by Dr. Alvin Stein MD, FACS, "*Acidosis is the only true disease and everything that makes us sick is simply a by-product of acidosis.*"

If you are healthy now, then drink alkaline **Tyent Water™** to help stay healthy through prevention. However, if your health is currently less than perfect, then take one of the shortest paths to recovery by drinking alkaline **Tyent Water™**.

It's a pretty simple decision. Save thousands of dollars on bottled water and improve your health at the same time. Drinking alkaline **Tyent Water™** is the single most productive thing you can do for your health.

Tyent USA will help you embrace the future of healing and prevention.

Yes, there is a better road to achieve the benefits that you need for a healthier lifestyle. Call **Tyent USA** today...and get on the road to better health now!

"...the most important advancement in healthcare since the discovery of penicillin" - **Dr. William Kelly**

**ALKALINE WATER...
THIS CHANGES EVERYTHING!**

THE HEALTHIEST WATER ON EARTH

Healthy, alkaline ionized water is created from ordinary tap water. When tap water passes through a **Tyent Water™** Ionizer, it is transformed into a substance unlike any other. This amazing transformation happens through the use of electrolysis, where the acidic component of your tap water is stripped away, and you are left with pure, alkaline, super-oxygenated, energy-rich, miracle water. It has more antioxidants per glass than any other natural drinkable substance.

This medical breakthrough has the support of doctors all over the world.

It is recognized by Dr. William Kelly as, "The most important advancement in healthcare since the invention of penicillin."

Dr. Robert Young said, "The **ONE** thing you can do to have better health would be to start drinking alkaline, ionized water."

FACTS

Our bodies are made up of approximately 80% water. Bottled, distilled and reverse osmosis waters tend to be very acidic, which will offset your body's pH and contribute to many problems that can be prevented by simply drinking ionized alkaline **Tyent Water™**. **Tyent Water™** is clean and filtered, but most importantly, it is alkaline, full of oxygen, 10 times more hydrating than bottled water, and it has oxidation reduction properties which protect your body at the cellular level. The unique properties of **Tyent Water™** make it one of the easiest, most affordable and healthiest choices that you can make to protect you and your family's health.

PROBLEMS

Disease thrives in an acidic environment! Almost all diseases can be traced back to a pH imbalance in the body, which puts a strain on the organs and body systems. Although we continuously strive for optimum health by making healthy lifestyle choices, our bodies continue to be in a constant tug-of-war, trying to achieve a proper pH. Diet, drink, stress and even pollution contribute to an unhealthy acidic pH in the body. Germs, disease and parasitic infestation can flourish in this environment. Other toxins, including free radicals, do further serious damage to the body on a cellular level.

SOLUTIONS

In order to get healthier and stay healthier, we must take care of our bodies by adjusting our diets and hydrating ourselves by drinking at least six to eight glasses of **Tyent Water™** on a daily basis. Continuing to drink **Tyent Water™** is the best way to get rid of the free radicals that cause damage to our cells. **Tyent Water™** promotes detoxification, and will help rid your body of toxic waste, all while keeping you extremely hydrated. By using a Tyent USA water ionizer in your home, you will obtain healthy clean water through our residential water filtration system, and you will immediately begin reaping the benefits of cellular oxidation reduction and optimum pH levels. If your body is alkaline, germs and disease don't have a chance.

TYENT WATER IS IONIZED WATER!

GLOSSARY OF TERMS:

FILTRATION FOR CLEAN WATER: Tyent RETTIN machines have two filters, while most water ionizers only have a single filter. One single filter is often insufficient for removing harmful substances in source water. With the Tyent RETTIN machine, your tap water passes through multiple stages of advanced filtration, leaving your water clean, pure, and ready for alkalization. The Tyent Rettin active carbon filter takes tap water and filters it to 99.99% purity.

ORP LEVELS / ANTIOXIDANTS: One of the most incredible aspects of the **Tyent Water™** is that it contains the lowest ORP levels of any home unit currently marketed in the U.S. ORP measures the oxidation reduction potential of the ionized water, which is the antioxidant measurement. The lower the number (measured in mv) the more antioxidants the water contains. The hydroxyl ions within **Tyent Water™** seek out and neutralize free radicals. Free radicals cause damage to our cells and contribute to disease and premature aging. So, as you can see, drinking **Tyent Water™** to neutralize these damaging free radicals can be extremely beneficial to your health.

ALKALINE: Just about everything that you eat and drink is acidic, including bottled water. The dying words of Louis Pasteur, "The germ is nothing, the terrain is everything" helps us to appreciate a need for creating and maintaining an alkaline environment in our bodies. Sustaining a slight alkalinity within the body ensures life, health and vitality.

OXYGEN: **Tyent Water™** gives you energy by providing your body with lots of oxygen!

Super Hydration: Ionized water is six times more hydrating than conventional water. **Tyent Water™** contains only five to six water molecules per cluster instead of the ten to thirteen that conventional water molecule clusters contain. These important attributes give **Tyent Water™** the ability to penetrate our body's cells more easily, offering super hydration on a cellular level.

Tyent Water™... Good Health on Tap!
